Sustainability Focused

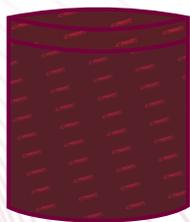

Save our Environment, Rivers & Oceans with Provit Plus

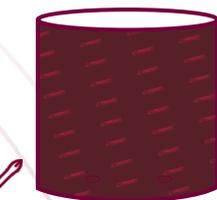

Every year, 380 million tons of single-use plastic ends up as waste, which causes destruction to our environment, animal and aquatic life.

We wanted to change that! That's why great effort goes into our packaging, trying to eliminate the concept of use and throw. All of our tin packaging is composed of reusable aluminium, which is completely plastic-avoidant and can be used for various other purpose such as a planter box or a storage box after the feed is over. There's also an added advantage - these specially designed tins with efficient sealing also allows the feed to be fresh for longer time and retains the aroma which promotes better feed consumption by your fishes. Even the large bags can be used as a planter bag or a storage pack after the feed is exhausted.

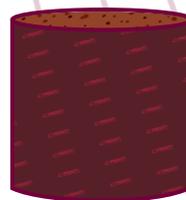

Make Planter Box with Provit Plus tins!

1. Remove the lid

2. Poke holes in the bottom

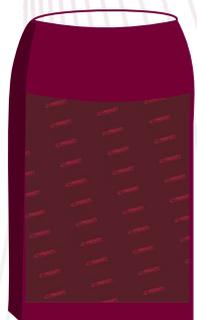

3. Fill it with soil

4. Grow your favourite plant

Make Planter Box with Provit Plus bags!

1. Cut open the bag

2. Poke holes in bag

3. Fill it with soil

4. Grow your favourite plant

The Future of Fish Feeding
Be the Pioneer! Make the change now to Provit Plus
